

IN THE ABSTRACT

Please amend the Abstract as follows.

Disclosed herein are Pseudoplastic-pseudoplastic aqueous dispersions comprising having solid and/or high-viscosity particles (A), dimensionally stable under storage and application conditions, in dispersion in a continuous aqueous phase (B), the dispersion comprising having at least one solid polyurethane-polyol (C) containing cycloaliphatic structural units and having a glass transition temperature $> 15^{\circ}\text{C}$, processes for preparing them, and their use.
